

To whom it may concern,

We would like to invite you to undergo a mammogram through the early breast cancer detection program promoted by the Emilia Romagna region. **A mammogram is a quick and simple test, reserved for women between the ages of 45 and 74.**

Please present yourself at:

**See The original letter**

The letter of invitation and the attached leaflet have also been sent to your Electronic Health Record (if you have activated it), to your Doctor and have also been sent to your address by second-class mail.

A radiology technician will perform the mammogram. The test **is free**, as are any future follow-up tests, and a request from your general practitioner (medico di famiglia) is not required. Please bring this letter with you.

If necessary, we will provide you with a letter to present to your employer, in order to justify your absence from work.

If you need to have more information or change your appointment, please call:

Monday to Friday (8:30am-5pm)

Saturday (8:30am-12pm)

Breast Cancer Screening Center (**059-438001**)

or you can write to: [screeningmammo@ausl.mo.it](mailto:screeningmammo@ausl.mo.it)

We will then send you a letter with the test results at home and will contact you if follow-up tests are required.

Remember:

- bring a document of identity (e.g. Identity card, passport)
- bring any previous mammogram results from tests not carried out within the screening program
- call us if you had a mammogram in the past year

If you are severely impaired and cannot reach the screening center, please contact us a few days before your scheduled appointment so that we may provide you with assistance.

**Take care of your health, please adhere to this invitation!**
